

Midland Main Line

Proposed viaduct over River Great Ouse and A6 Paula Radcliffe Way

A6 The Great Ouse Way diverted over the new railway

Some properties in this area would be acquired (refer to technical report for more details)

Two additional tracks required in this section, to the east of the Midland Main Line

We are considering:

- Building two new tracks to the east of the existing railway
- Introducing a range of infrastructure interventions to support this, as shown on this map
