

Specialist DOORS Engineer

Employer:	East West Railway Company (EWR Co)
Location:	London initially, then based in the Oxford-Cambridge corridor
Basis:	Permanent
Team dimensions:	Reporting directly to the Head of Systems Engineering

Would you like to be at the forefront of the changing landscape of the rail industry?

A little bit about us:

East West Rail is a proposed new rail link between Oxford, Milton Keynes, Bedford, Cambridge and potentially beyond. As part of the wider plans for this strategically important corridor, it is one of the most high profile infrastructure projects in the UK today. The new railway will improve local connectivity and serve as a catalyst for economic development and the creation of new housing, as well as significantly reducing existing journey times.

Key accountabilities:

As Specialist DOORS Engineer for the East West Rail scheme you will:

- Be responsible for the quality, management, configuration and version control of system requirements across the East West Rail programme
- Manage requirements using IBM Rational DOORS
- Be responsible for configuration management of requirements
- Oversee Change Management of Requirements
- Maintain traceability across requirements
- Generate and communicate metrics demonstrating the health and status of requirements
- Work with other members of the EWR Co. team and with our contractors to ensure requirements are captured, recorded and managed

- Define processes and procedures that set out EWR Co.'s approach to requirements management
- Support the EWR Co. commitment to customer service and an excellent customer journey
- Take responsibility of your own and others' health and safety by adopting and working to the EWR Co. Health and Safety principles
- Co-operate with EWR Co. in all matters relating to health and safety, including following safe working procedures at all times
- Act as a role model for EWR Co.'s vision and values, behaving in ways that are aligned with EWR Co.'s Ways of Working, as well as encouraging and supporting others to do so too
- Promote diversity in the workplace and adopt appropriate behaviour when interacting with colleagues

Given the early stage of the project, it is likely that the nature of the role may evolve as the project progresses. It is also possible that other ad-hoc activities and duties may be required.

You should apply if you have:

As Specialist DOORS Engineer for the East West Rail scheme, you will have with at least 5 years' experience in a comparable position, in a safety critical environment, preferably in the rail industry.

Preferably, you will also have some experience of holding roles in fast paced and complex environments during the setup of a new organisation.

Your skills and experience will include:

- Relevant experience of working in a System Engineering environment - ideally within the railway or construction sectors
- Experience in IBM Rational DOORS
- Track record as an effective team player with strong interpersonal skills
- Commercial awareness
- Strong analytical and problem-solving skills
- Experience and strong understanding of working in matrix team working environments
- Excellent communication and presentation skills

Education and Qualifications

- Degree in a relevant subject or equivalent experience and training
- You will need to have the right to work in the UK
